ADVANCING MOTION

PERFORMANCE ACTUATOR KITS

G25-550 | G25-660 Internally Wastegated Turbochargers

Garrett® G25 performance actuator kits are available in 0.5 bar, 1.0 bar, and 1.5 bar configurations. Kits are available in standard and reverse rotation for the G25-550 and G25-660 V-band turbine configurations and standard rotation only for the T4 turbine configuration. Actuator kits provide all parts needed to update the turbocharger (actuator assembly, rod end, jam nut, retaining ring, lock nuts, bracket bolts, and bracket). Assembly and calibration required. Contact your preferred distributor for more details including pricing and availability. *Turbocharger not included.*

Garrett G25-550 G25-660 Actuator Kit		
PN	Description	Bar
759498-0008	V-band Standard Rotation	0.5
759498-0009	V-band Standard Rotation	1.0
759498-0010	V-band Standard Rotation	1.5
759498-0011	V-band Reverse Rotation	0.5
759498-0012	V-band Reverse Rotation	1.0
759498-0013	V-band Reverse Rotation	1.5
759498-0014	T4 Standard Rotation	0.5
759498-0015	T4 Standard Rotation	1.0
759498-0016	T4 Standard Rotation	1.5
